

Matters needing attention:

1. Please read the instructions carefully before installation;
2. Ask a professional electrician to install;
3. In order to avoid the danger of electric shock, please confirm to turn off the power supply before installation and maintenance;
4. Installation water depth does not exceed 1 meter;
5. Keep the manual for reference;
6. This product can not be used in underwater environment with people, such as swimming pools, hot springs, health pools, etc.

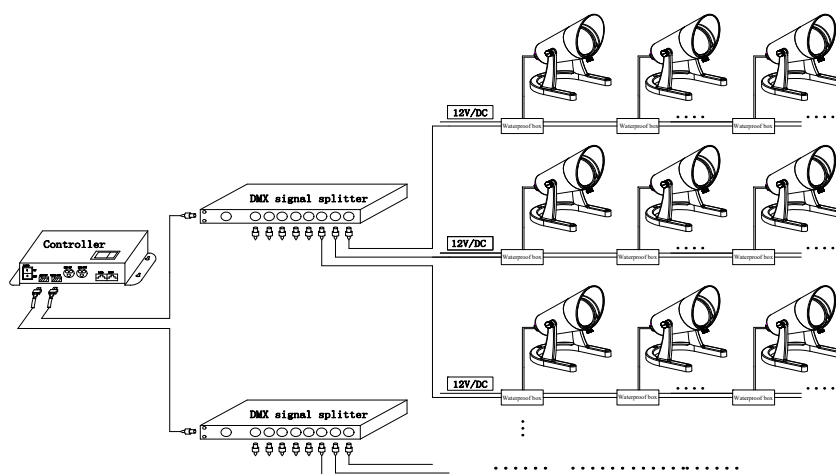

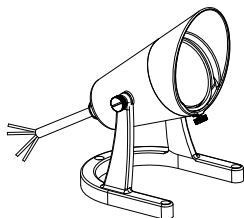

Installation steps:

I. Installation of lamps:

1. Lamps are limited to underwater installation, as shown on the right;
2. Use screws with a diameter of 4mm and a length of $\geq 32\text{mm}$ to fix the lamp through the three mounting holes of the base;
3. Loosen the screw, you can adjust the tilt Angle of the lamp;

II. Wiring and control adjustment:

Brown line: The power input is positive
Black line: The power input is negative
Blue line: DMX signal input positive
Yellow and green lines: DMX signal input negative

4. Match and connect each wire core of the lamp with the power input (12V/DC) and the signal input line respectively;
5. Connect all the lamps to a control network and adjust the controls as needed (if the lamps have no DMX function, there is no need to connect the signal input line)

Note:

1. If the glass protective cover is found damaged during installation, the whole lamp must be replaced;
2. Do not connect underwater, unless there is a special underwater junction box with underwater certification;
3. Lamps have ON/OFF version and DMX version, ON/OFF version only need to connect the power input line.
